Thank you for taking the time to stop by our site, whether you are family, a friend or someone that passed this along to you, welcome either way!

"God is truly amazing!"

We could never place into words what this journey has truly been like, but we wanted to share as much as possible with you so that you could try to understand the catastrophic impact cancer can have on a family. It changes everything, and because of that our HOPE is through sharing our story - it will leave an imprint on your heart to live differently too. At 8 months old our son was diagnosed with anaplastic ependymoma / grade III , a brain tumor that typically is in the 4th ventricle of the posterior fossa.

By the endless grace of our Lord we have been sustained and our faith and love for God has truly been put into perspective. There is no way we could do this without "His Love". So all the Glory be to you God.

Above is a photo of the rainbow that God placed on the expressway as soon as we started driving south to get to St. Jude. We believe God wanted us to know that we were going in the right direction! Just days later, as you will see in our journal of updates he gave us another rainbow here in Memphis arriving to St. Jude's Children's Research Hospital even bigger than the first one. "HE" is always lighting the way
